

Lesson Plan: Fluke Certification Testing **(Time Agenda: 2 Days – 8 Hours)**

100% Attendance is required

Fluke Networks Copper/Fiber Testing is an 8-hour course utilizing the Fluke Versiv testing equipment. This covers proper setup, testing, troubleshooting, and project management using the latest Fluke Networks tester. The course entails both copper cabling and optical fiber testing procedures and best practices. Also discussed is Fluke Linkware software and the latest tools available to our technicians. Participants will have the opportunity to create projects, enter user information, select test methods, and perform tests during hands-on exercises.
